

Template Week 7 – Host your website on GitHub

Student number: 560830

Domain name (URL) of your website on GitHub:

The screenshot shows a web browser window with the URL `s1ard.github.io/IT_Fundamentals/` in the address bar. The browser interface includes standard navigation buttons (back, forward, search), a tab bar with multiple open tabs, and a toolbar with various icons. Below the header, there is a horizontal menu with links labeled "home", "week 1", "week 2", "week 3", "week 4", "week 5", "week 6", and "week 7". The main content area displays a dark-themed website. At the top, it features the text "My singular and only hobby ever" in white, followed by "Making stuff" in a smaller white font. Below this, a paragraph reads: "My hobby is making stuff. I like making programs, games, and things for other people to enjoy." Underneath, it says "Projects I've worked on:" followed by a large image of a pixelated red alien with horns and a green, textured body, set against a starry background. The alien is associated with the game "ALIEN GATEKEEPERS WHO WILL YOU LET THROUGH?".
